

Packing list: 2pcs motor + 2pcs wheel
Please carefully read the product
description and pictures before buying

Operating voltage: 3V to 12V DC (recommended operating voltage is about 6 to 8V)
1, maximum torque: 800gf, cm, min (3V)
2, no-load speed: 1:48 (3V)
3, load current: 70mA (250mA, MAX) (3V)
4., this motor plus EMC, anti-interference ability. No interference to the microcontroller.
