

- This is a terminal adapter for arduino Nano. It labels for arduino Nano version 3.0, however you can still use this adapter for the older version (just have to remember that A0-A7 are in the reverse order). You can use this adapter to easily hook up for arduino Nano to an outside world via hook up wires.
- Board Size: 54.8\*36.6mm

### Package Included

1PCS\*New Terminal Adapter Board for arduino Nano V3.0 AVR ATMEGA328P-AU Module
